

Be COVID-19 Vaccine Ready with AccuShelf™ TM-C

The Complete Vaccine Management System for COVID-19

Establish a robust COVID-19 vaccine infrastructure today with the AccuShelf Inventory Management System. The AccuShelf system ensures compliance by simplifying complex COVID-19 vaccine workflows and protects vaccine integrity. With AccuShelf, track every COVID-19 vaccine dose from receipt to patient to record lot, expiration and dose. Also obtain real-time temperature monitoring with integrated ultra-low and standard digital data loggers.

With this offer, you will be prepared for the COVID-19 vaccine rollout and strengthen your entire vaccine infrastructure for years to come. For only \$250 per month, this offer includes:

- AccuShelf Temperature Monitoring System with wireless scanner
- x1 ultra-low temperature digital data logger
- X2 standard temperature digital data loggers
- Automated COVID-19 vaccine workflows with expiry tracking and real-time dose tracking
- Management and workflows for all vaccines

Take advantage of this lowest price ever offering for the COVID-19 AccuShelf system and start your robust vaccine infrastructure today.

Add our “Medication and Materials Management” component and obtain a complete inventory solution to track all medications, vaccines, and materials. This is only an additional \$45 per month.

To take advantage of this offer today, please complete this form and return with your completed AccuShelf Agreement and Quote before December 31st, 2020.

Best regards,

E. Scott Starke
